

Application Brief

Integration of RFID Smart Labels for Third Party Logistics

Industry

Consumer Goods
Industrial Goods

Products

Duratran Thermal Transfer and Duratherm
Direct Thermal RFID Labels and Tags
TMX1500, 2200 Ribbons
PM4i RFID Enabled Printer
Rigid Tags
IT65
IT67
IP30
IF4

Regions

North America, LATAM, EMEA

Typical Applications

Supply Chain Management
Receiving/Cross Docking
Warehousing/Sortation/Distribution
Transportation & Logistics

Customer Benefits

- Improved accuracy in shipping, receiving, inventory control
- Reduction in processing time and inefficient work activities
- Reduced labor requirements
- Assured compliance with government and industry standards
- On-demand generation of high quality RFID labels increase error free shipments and provide traceability
- Optimized hardware performance with integrated Intermec printer, reader, and RFID Smart Labels or rigid tags for a total solution
- Stocked carton & pallet Smart Label sizes available for quick shipment

Industry Need

Effective warehouse management involves the control and monitoring of movement of materials including receiving, storage, picking, staging, and shipping. The increased use of outsourcing these activities has given rise to the rapid growth of third party logistics or 3PL. 3PL providers typically specialize in integrating warehousing and operation services that can be scaled and customized to a customer's requirements. The use of 3PL has become a cost effective way for many businesses to reduce supply chain costs and increase customer satisfaction. With any logistics process, opportunities for human error exist resulting in misplaced or mis-directed inventory. However, with 3PL providers handling inventory for a multitude of customers, high levels of accuracy and efficiency as well as visibility within the operation have become critical requirements.

Intermec Solution

Intermec's Smart Labels offer powerful RFID technology packaged in the most reliable, durable labels in the industry to meet the business and operating demands in the 3PL environment. The use of RFID Smart labels enables visibility and monitoring of cartons and pallets at process points as they move through the warehouse. Operators do not need to scan individual bar codes thus eliminating the opportunity for human error which can create problems with misplaced, mis-identified, and mis-shipped product and result not only in customer dissatisfaction but also in many cases expensive charge-backs. This improved accuracy in shipping, receiving, and inventory control also results in a reduction in processing time and inefficient work activities. The capability of scanning pre-applied RFID labels upon receipt with an Intermec IP30 or generating Smart Labels at the point of activity on-site with one of Intermec's industrial RFID printers enables real-time coordination throughout the supply chain linking the customer to the product and to the location within the chain. With the ability to offer a variety of both inlays and printable label and tag materials, Intermec Media engineers are able to develop flexible RFID Smart Label solutions that will meet the requirements in various 3PL environments to insure optimum performance. For fleet and yard management, trailer tagging, or the tagging of other metal items for long term use Intermec offers rugged, durable rigid tags.

The key to any successful implementation of an RFID system is working with a provider that has the knowledge and expertise to offer clear guidance in creating a solution that is sustainable and extensible to improve business processes and to deliver future benefits. Intermec is a leader in RFID technology and standards development with extensive experience in helping manufacturers, distributors, logistic providers, and other businesses implement complete RFID solutions for mission critical applications.

Media Product Recommendation

RFID Gen2 Duratran Thermal Transfer or Duratherm Direct Thermal labels [Profile](#)

Ribbon Recommendation

TMX1500

TMX2200

Printer Recommendation

PM4i RFID Enabled Mid Range Printer [Profile](#)

- **Smart** – Powerful smart-printing capabilities enable error-proofing, simplify processes and improve results
- **Strong** – Superior throughput, designed to excel in demanding environments
- **Secure** – Advanced, secure network connectivity options

RFID Rigid Tag Recommendation

IT65 Large Rigid Tag [Profile](#)

IT65 Small Rigid Tag [Profile](#)

IT67 Enterprise Lateral Transmitting (LT) Tag [Profile](#)

Reader Recommendation

IP30 Reader [Profile](#)

IF4 Reader [Profile](#)

Services

RFIDeDeploySM Services ensure solution optimization [Portfolio](#)

The Intermec Advantage

Intermec RFID printers, Smart Labels, and readers are optimized to deliver superior performance when used together. Our rigorous testing and co-engineering ensures consistently high print quality, proven label and tag performance in demanding real-world environments, and maximum print head service life for reduced downtime.

Intermec printers and media are complemented by our complete line of integrated solutions and services, including rugged mobile computers, RFID systems and RFID Deploy services, and advanced scanning technology. Intermec products and services are used by customers worldwide to improve the productivity, quality and responsiveness of their business operations.

Printhead Replacement Program

Intermec will provide no cost replacement printheads, as failures occur due to normal wear and tear, to those customers who use Intermec Media Products exclusively with their Intermec direct thermal and thermal transfer fixed printers. For full details, click [here](#).
