

INVENTORY MANAGEMENT SYSTEMS

**Watch your ship times reduce, your accuracy increase
and your inventory carrying costs shrink.**

Effective Inventory Management Systems enable an organization to meet or exceed customers' expectations of product availability while maximizing net profits and minimizing costs. Our solutions have advanced features which will help you to do just that!

Ahearn & Soper's Inventory Management Systems are designed to help companies conduct physical inventories and track inventory to its location, as well as improve inventory accuracy and optimize labour productivity.

Ahearn & Soper's Inventory Management Solutions are seamlessly integrated, cost-effective, powerful & feature rich

- Flexible, user-friendly and easy to operate
- Automate inventory reconciliation and physical inventories
- Quick & accurate inventory counts by utilizing mobile computers, such as portable mobile computers / PDTs, to scan bar codes or RFID tags
- Reduce shrinkage
- Track inventory to a specific location, track lots and expiration dates
- User-customizable fields allow the user to specify the naming of each field to fit the terminology of their business
- Generate user-customized reports
- Log into history and see the receipt and movement of inventory
- Used by companies large and small who want to conduct a quarterly, bi-annual, or yearly physical inventory

For all of your Inventory Management needs or for more information on Inventory Management Systems, contact an Ahearn & Soper expert.
