- Raising the bar on inventory control:**
- Better Inventory Accuracy & Visibility
  - Reduce Data Errors
  - Improve Reconciliation Time
  - Improve and Increase Processing

**Training | Consulting | Professional Services**

Call our **PSG Experts TODAY** and design solutions for all types of applications!

### Custom Programming & Engineering

With **Ahearn & Soper** software solutions, you can take advantage of leading edge technology for all your Data Collection needs and feel confident that your Implementation will be a success.

Our System Specialists have extensive knowledge and experience with complex software and hardware interoperability issues and can free you of this burden that can cause any project to grind to a complete halt.

**Ahearn & Soper will not only provide 'peace-of-mind' but complete support for your solutions today and for many years to come.**

### Wireless Site Surveys & Analysis

For RF and RFID Systems, many considerations about the application must be factored in. We can provide you with valuable services such as Facility Analysis to ensure proper performance, redundancy and network security.

Ask us how we can help you overcome RF network issues including Facility Size, Product Storage, Racking, Machinery, Noise/Interference, Layout, Number of Users and Throughput.

**Ahearn & Soper** will maintain backbone and client device documentation so future technical support calls are more productive.

**The site survey will ensure your project completes on time, on budget and with no costly surprises.**

### Professional Service & Support

**Ahearn & Soper** takes full responsibility for the solutions we deliver, including post sales service, support and supplies. Over 80% of our employee workforce are factory-trained, certified specialists and technicians. We also offer vital services such as Call Centre Support, Remote Monitoring Service and Technical Training and Support for mission critical applications.

*AirMagnet Survey Signal Analysis*

### Project Management

Our Project Management Team can take your Auto-ID / Data Capture project from the requirements analysis and planning stage to the development, documenting, testing and installation phase. Once installed and users are trained, a 'go-live' date can be scheduled for full deployment.

**We ensure all requirements and deadlines are met to your satisfaction.**
