

THE SOFTWARE TOOL THAT PUTS YOU IN CONTROL  
OF YOUR MAINTENANCE

Two crossed wrenches, one open and one closed, are positioned in the center of the page. The background is a warm orange gradient with a subtle geometric pattern.

# maintenance

ensure your equipment reliability

**Simplify** your maintenance cycle  
and **gain** efficiency

---

# Ensure your equipment reliability and **control** your budgets

## 1. Organize

**SAVE TIME** by no longer having to search for your data

**DISPLAY** your data in a format that meets your needs perfectly

**SIMPLIFY** your navigation and see only the information you want

**SCHEDULE** your preventive alerts to avoid unwanted stress

**ENSURE** your employees' safety by including lockout procedures with your maintenance

**STANDARDIZE** your processes to meet your business goals

**BUDGET** your maintenance expenses accurately at the start of the year

## 2. Plan

**SCHEDULE** your work based on available resources

**OPTIMIZE** equipment productivity/availability by planning your maintenance

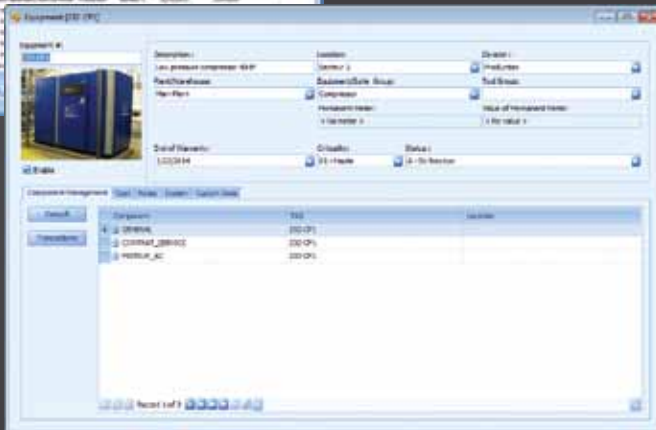

**BALANCE** your workload—your employees will thank you!

**SCHEDULE** your maintenance visually to avoid surprises

**MEET** your priorities by establishing prevailing standards for your planning

**CONTROL** your planning with Interlat's fully dynamic calendar

**ORDER** your parts at the right time by planning their use

The planning board is an essential tool for all maintenance supervisors. It allows decision-makers to plan all short-, medium-, and long-term work. Highly visual and fully customizable, this exclusive Interlat tool is completely dynamic and consolidates all your past, present, and future maintenance work.

You will know the status of your maintenance and have total control over your processes at all times.

**Internal Maintenance** is a highly efficient and user-friendly maintenance management application adapted to many sectors. The accurate and consistent information on equipment, building and vehicle maintenance is invaluable for users. Monitoring of the financial implications of repairs is a great asset for managers.

### 3. Perform

**ELIMINATE** lost time with simple and effective forecasting tools

**HAVE** all the information you need during your operations

**MANAGE** emergencies without having to return to your workstation

**MAKE** entries (time and parts) right on the floor using barcode technology

**AVOID** costly errors

### 4. Analyze

**IDENTIFY** problem areas in the first weeks of use

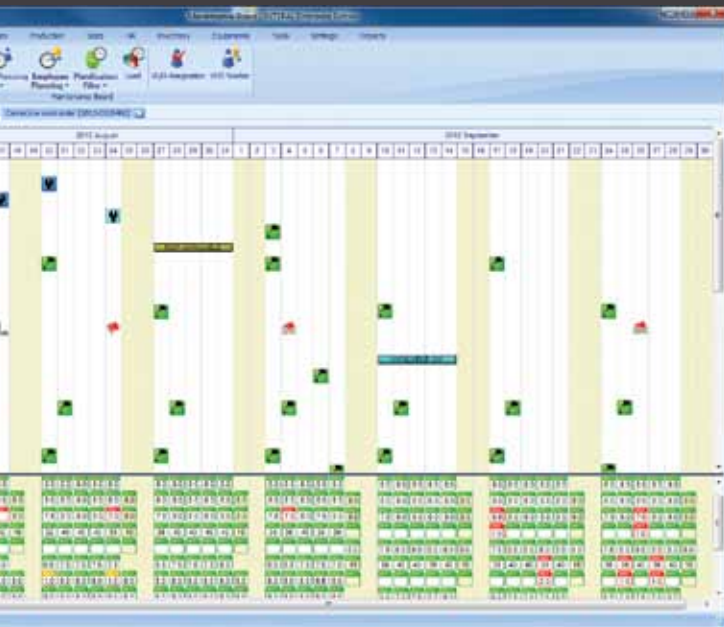

**ANALYZE** results using the many reports available or by creating your own custom reports

**DETECT** potential anomalies before they occur

**BENEFIT** from corrective action by detecting recurring failures

**PLAN** and review your budgets efficiently using statistics

**ANALYZE** and minimize downtime  
**MANAGE** costs and stay on budget

# Choose options for **increasing** your productivity

---

Internal Maintenance software is widely renowned for its quality and range of maintenance functions. And additional options are available to make it even more useful.

## INTERNAL WEB TECHNOLOGIES

Access your work in progress and inventories wherever you are!

Depending on your needs, choose to work online or off.

## IPAD®-NATIVE SOLUTION

Use the best tools, with all the advantages of a tablet!

## NOTIFICATIONS FOR REMOTE MANAGEMENT

Be informed immediately and make decisions quickly with notifications on your smartphone.

## BARCODE TECHNOLOGY

Capture accurate, real-time data using barcode technology and mini-scanners.

Available on iPad®

# Take advantage of Interl Maintenance now and get the most out of your equipment

---

Basic needs?  
Choose Interl  
Standard - Maintenance

One of the most complete software solutions on the market offering the functions required for sound maintenance management. With the same user interface as the Enterprise version, its intuitive use facilitates daily tasks and lets you efficiently improve your maintenance standards. You can migrate to the Enterprise version at any time.

More complex needs?  
Opt for Interl  
Enterprise - Maintenance

The perfect solution for managers who want better planning of maintenance operations and validation of the results using powerful statistical tools. The Enterprise version also offers multisite functions for businesses spread out geographically and lets you opt for smart Health & Safety functions for the safety of your employees. Screen personalization tools and many other options are also provided with the Enterprise version.

Want peace of mind?  
Take advantage of our Hosting solution

With the Hosting solution, your data is stored on the Interl servers that also handle IT administration for the software, including installation. You access the software via your Internet browser, thereby minimizing your initial investment.

Also available with Interl Enterprise
