# A&S ParcelPackage Trackr

*Tired of mail and small packages being lost on the way to their appointed internal destination?*

## Overview

All large organizations can receive volumes of mail and packages each day, the challenge is knowing where they went after being received. With the **A&S ParcelPackage Trackr**, packages are tracked internally from the initial pick-up point to the final delivery/drop point. This eliminates time or effort spent on searching for lost mail and packages. A simple mail delivery solution developed for large organizations including Office Towers, Universities, Hospitals and other large headquarter buildings.

**Receiving Packages:**
When packages are delivered to your department by a carrier, they are scanned into the software system and associated with the correct recipient.

When you receive a package, scan or enter information into your handheld computer such as:
✔ *Package ID*
✔ *Package type* (i.e, letter, box,

*Our new software solution works with devices like the Honeywell CT40 and is available on Google Play Store for Android devices. Some key features include signature & image capture.*

**GET IT ON Google Play**

*A&S ParcelPackage Trackr, system is capable of running on various leading handheld scanners and mobile computers, the software is written for Android.*

*Optional Feature:*
*Allows for easy turn off/on e-mail notifications for recipients for when their mail or package has arrived.*
